Saab

Swedish company within Security & Defence sector

Around 16,000 employees

Annual sales around SEK 31 billion, 23 % invested in R&D

Gripen Fighter

TX Trainer

Global Eye

Saab & Innovation

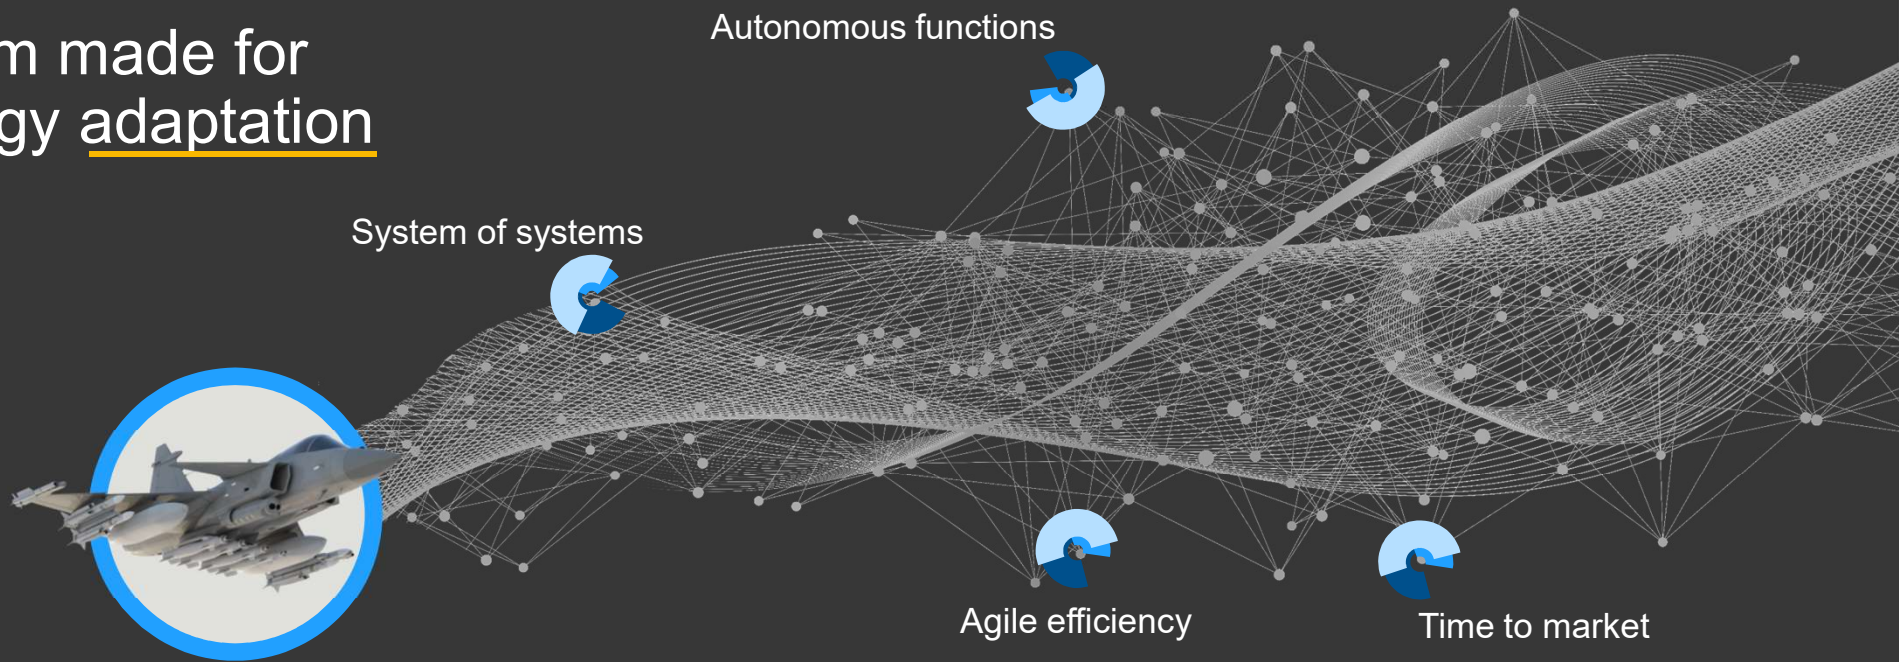

We have a heritage of innovation in our various products throughout the years (examples: J21 – ejection seat, J29 – speed records, Viggen – data link and central computer)

Innovation is not limited to pure product innovations

Gripen has a world class avionics system and state of the art model based/simulation driven methodology.

Innovation through collaboration is key to future success

A platform made for technology adaptation
